

Features

2:1/4:1 Wide Input Range

Operating Temperature Range: -45~105°C

Approved to CE, RoHS & REACH

Safety Standards to IEC/EN 62368-1/EN 50155

Efficiency up to 92%

EMC Class A & B

Single output 9~425V DC

28SQBxy-x-x-B150-IP Series

DC/DC PCB Mount Power Supply

Ideal Power's 28SQBxy-x-x-B150-IP 150W Quarter Brick DC/DC Converters Series are certified to UKCA, CE, RoHS, REACH & EN 62368-1/IEC 62368-1/EN 50155 Standards and comply with Efficiency Regulations. These are primarily used in ITE, Audio & Video, Railway Industries, and customised solutions are available upon request.

Description

Ideal Power Supreme series - Quarter Brick converter is composed of Isolated, board-mountable, fixed switching frequency DC-DC converters that use synchronous rectification to achieve extremely high-power conversion efficiency. These DC-DC converter modules use advanced power processing, control, and packaging technologies to enhance the performance, flexibility, reliability, and cost effectiveness of mature power components. Each module is six-sided metal case enclosed to provide protection from the harsh environments seen in many industrial and transportation applications

Input Data

Parameter	Notes and Conditions		Min.	Typ.	Max.	Unit
Transient Input Voltage Ranges	28SHB018 models (100ms Max)				50	VDC
	28SHB024 models (100ms Max)				50	
	28SHB036 models (100ms Max)		--	--	100	
	28SHB110 models (100ms Max)				250	
	28SHB300 models (100ms Max)				500	
Operating Input Voltage Ranges	28SHB018 models		9	18	36	VDC

Potting material	Silicone				

Standards Compliance

Parameter	Standard	Test conditions	Performance criteria
Environmental Compliance	Reach; RoHS	--	Pass
EMI	EN55022	--	Class A / Class B
ESD	EN61000-4-2	±4 kV Air Discharge ±4 kV Contact Discharge	Crit. A
Radiated Immunity	EN61000-4-3	Level 2, 3 V/m	Crit. A
Fast Transient	EN61000-4-4	±2 kV Applied	Crit. A
Surge	EN61000-4-5	±2 kV Applied	Crit. A
Conducted Immunity	EN61000-4-6	Level 2, 3 V rms	Crit. A

It is recommended to protect the input by fuses or other protection devices.

Modules could meet EN55032 Class A and Class B standard with external components.

The information and specifications contained in this data sheet are believed to be correct at time of publication. All specifications are subject to change without notice. No rights under any patent accompany the sale of any such products or information contained herein.

Conducted EMI

Shape – B (Base Plate with DOSA pinout)

Shape – F (No Flange Base Plate with DOSA pinout)

Shape – B (Base Plate with Vicor pinout)

Shape – F (No Flange Base Plate with Vicor pinout)

Pin#	Function
1	-Vin
2	NC

Trimming Output Voltage - For Single Output Models

Only the single output converters have a trim function. That allows users to adjust the output voltage from +10% to -10%, please refer to the trim table that follow for details. Adjustments to the output voltage can be used with a simple fixed resistor as shown in Figures 1 and 2. A single fixed resistor can increase or decrease the output voltage depending on its connection.

Note:

- ※ Trim adjustments higher than the specified range can have an adverse effect on the converter's performance and are not recommended.
- ※ If the trim function is not used, leave the trim pin open.

Figure 1. Trim Connections To increase Output Voltages Using Fixed Resistors

Figure 2. Trim Connections To Decrease Output Voltages Using Fixed Resistors

Trim up resistor value(KΩ)										
Vout	1%	2%	3%	4%	5%	6%	7%	8%	9%	10%
5	109	50	30	20	14	10	7	5	3.3	2

48	1039	464	273	177	120	81	54	34	18	5

Enable Control Function

The primary-side, Enable Control function can be specified to operate with either positive or negative polarity. Positive-polarity devices are enabled when the enable pin is left open or is pulled high. See "Enable Function Input. Positive-polarity devices are disabled when the enable pin is pulled low (under +1.0V with respect to -input). Negative-polarity devices are off when the enable pin is high/open and on when the enable pin is pulled low. See Figure 3.

Figure 3. Driving the Enable Control pin

Trim down resistor value(KΩ)										
Vout	-1%	-2%	-3%	-4%	-5%	-6%	-7%	-8%	-9%	-10%

28	860	392	236	158	111	80	57	41	28	17
48	1413	638	380	251	173	121	85	57	35	18

Output Ripple Noise

The two copper strips simulate real-world PCB impedances between the converter and its load. Scope measurements should be made using BNC connectors or the probe ground should be less than 1/2 inch and soldered directly to the fixture. All external capacitors should have appropriate voltage ratings and be located as close to the converter as possible. Temperature variations for all relevant parameters should be taken into consideration. The most effective combination of external I/O capacitors will be a function of line voltage and source impedance, as well as load and layout conditions. See Figure 4

Figure 4. Measuring Output Ripple/Noise(20MHz bandwidth)

Recommended Circuit Diagram for conducted EMI Class A
