

Features

- Universal input 195~264V AC
- Short Circuit Output Protected
- Approved to UKCA, CE
- LVD & EMC Class B Certified, RoHS & REACH compliant
- 12V Lead Acid 3 Stage Control (Fast/Normal/Float)
- OVP, OCP, OTP Short Circuit
- LED Charge Indicators Included

Ideal Power's 31ACNN12-RS Range of 12V Lead Acid Battery Chargers Series are certified to UKCA, CE, RoHS, REACH & EN 62368-1 Standards and comply with the relevant Efficiency Regulations. These are primarily used in ITE, Audio & Video Industries and customised solutions are available upon request.

Models	31AC2512-RS
Input Voltage	195~264V AC / 230V AC +/-15%
Input Frequency	47Hz ~ 63Hz / 50-60Hz +/- 5%
Output Max Current	25A
Output Power	300W
Output Voltage	14.6~13.7V DC Float charge / absorption charge
Ripple & Noise	115 ~ 350 mVp-p (model dependant)
Isolation	Input isolate Chassis: 500M OHM
Battery Application	Lead Acid Battery
Fan Control	Fan on fast speed: Bulk/Absorption charge Fan on slow speed: Float charge
LED - Power	Red
LED - Charging	Orange
LED – Fully Charged	Green
DC Cable	1.0M Mount clips
Dimensions	240 x 180 x 76 (LxWxH) mm
Weight	3.0 (Kgs)

Specifications subject to change without notice.

Applications			
Communication devices	O Power generators	© UPS	Power Inverters
Vacuums Pumps	Sailing boats		Ambulance
© Fire trucks	© Emergency vehicles	© Electrical car & bicycles	Mobile command centres
Household items	CommunicationEquipment's	Automobiles	

NOTE: *This version is with a Universal Input

31ACNN12-RS Lead Acid Battery charger Series

31ACNN12-RS Lead Acid Battery charger Series

Three Steps of Charging & Charge Curve

Step 1	Bulk charge – bring batteries to 75% capacity fast.
	During this stage charging occurs at full power, which means maximum current, until the battery voltage reached the set limit.
Step 2:	Absorption Charge, boost – slow the current flow, adjusting for maximum efficiency and gently topping off batteries. During absorption charging the current decreases as the battery approached full charge.
Step 3	Trickle Charge – for longer period, maintains fully charged batteries without harmful effects of overcharging and cooking. Trickle charge is intended to keep the battery in a fully charged state and compensates for self-discharge. When the current reaches setting point the battery switches
