

IDEAL OWER 31ACXX24A-RS 24V Lead Acid Battery charger Series

Features

- Universal input 100-240VAC
- Output Power: 96-168W
- **Aluminium Enclosure**
- Approved to UKCA, CE
- LVD & EMC Class B Certified, **RoHS & REACH compliant**
- 24V Lead Acid 3 Stage Control (Fast/Normal/Float)
- OVP, OCP, OTP & Dry; Short Circuit

Ideal Power's 31ACXX24A-RS Range of 24V Lead Acid Battery Chargers Series are certified to UKCA, CE, RoHS, REACH & EN 62368-1 Standards and comply with the relevant Efficiency Regulations. These are primarily used in ITE, Audio & Video Industries and customised solutions are available upon request.

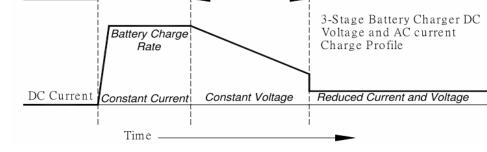

Models	31AC0424A-RS	31AC0524A-RS	31AC0724A-RS
Input Voltage	115V / 230V Auto Switch		
Input Frequency	47Hz ~ 63Hz		
Output Max Current	4Amp	5Amp	7Amp
Output Power	96W	120	168
Output Equalizer	29.2V +/- 0.2V (Can be order specific)		
Output Float	27.4V +/- 0.2V (Can by order specific)		
Battery Application	Lead Acid Battery		
LED - Power	Red		
LED - Charging	Orange		
LED – Fully Charged	Green		
Mains Lead	1.8M EURO Plug + 1.8M UK fuse Plug		
DC Cable	SPT2 2C 18AWG at 1.2M Mount clips		
Dimensions	180 x 88 x 47 (LxWxH) mm		
Weight	0.8 (Kgs)		

Specifications subject to change without notice.

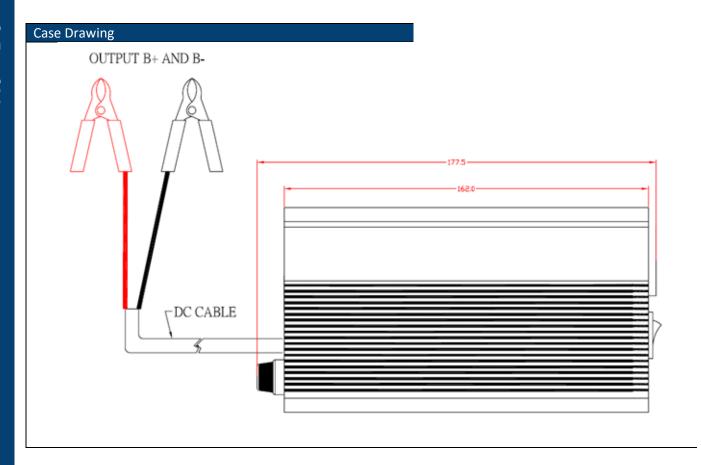

Applications			
© Communication devices	Power generators	© UPS	Power Inverters
Vacuums Pumps	Sailing boats		Ambulance
© Fire trucks	Emergency vehicles	© Electrical car & bicycles	Mobile command centres
Household items	© Communication	Automobiles	
	Equipment's		

Three Steps of Charging & Charge Curve Charging Started DC Voltage DC Voltage Bulk Charge | Absorption Charge | Float Charge | Float Volts Setting | F

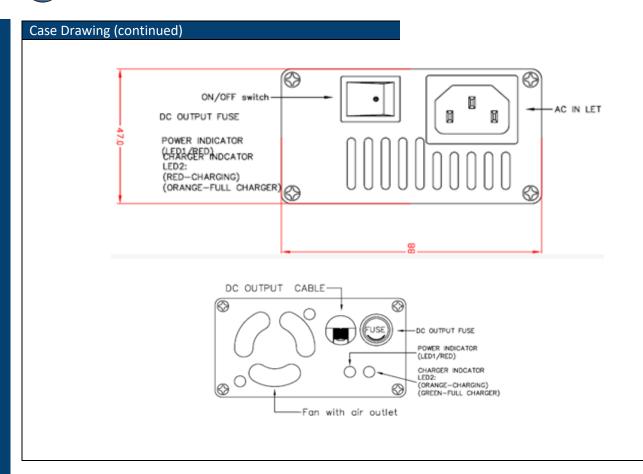

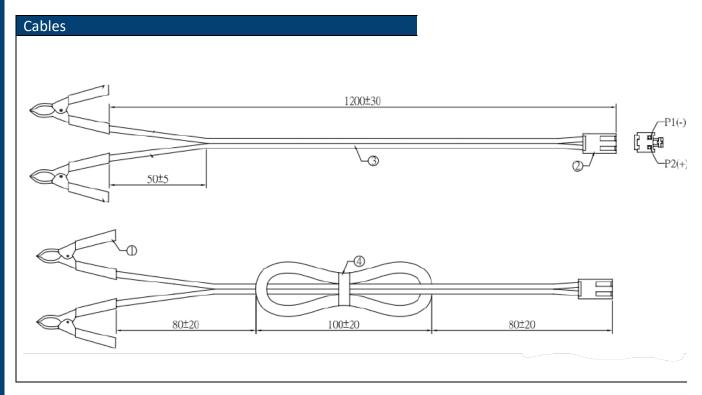

Step 1	Bulk charge – bring batteries to 75% capacity fast. During this stage charging occurs at full power, which means maximum current, until the battery voltage reached the set limit.
Step 2:	Absorption Charge, boost – slow the current flow, adjusting for maximum efficiency and gently topping off batteries. During absorption charging the current decreases as the battery approached full charge.
Step 3	Trickle Charge – for longer period, maintains fully charged batteries without harmful effects of overcharging and cooking. Trickle charge is intended to keep the battery in a fully charged state and compensates for self-discharge. When the current reaches setting point the battery switches to a maintenance charge at a constant voltage. Should the battery be in use and the charge current Subsequently exceed setting point the charger will automatically return to the beginning of the three-step charge characteristic.
