

6W, Ultra wide input, isolated & regulated dual/ single output, DIP package, DC-DC converter

UL CB CE Patent Protection RoHS

36URA_ZP-6WR & 36URB_ZP-6WR3 series products are of 6W output power, extremely wide range of voltage input of 9-36VDC, 18-75VDC, isolation voltage of 1500VDC, output over-voltage protection and output short circuit protection with the bare component in compliance with CISPR22/EN55022 CLASS A; these products are widely used in fields such as industrial control, electric power, instruments and communication.

FEATURES

- Wide range of input voltage (4:1)
- Efficiency up to 88%
- No-load power consumption as low as 0.12W
- Isolation voltage :1500VDC
- Operating temperature range: -40°C to +85°C
- Input under-voltage protection, short circuit , over-voltage & Over-current protection output
- Meet CISPR22/EN55022 CLASS A
- International standard pin-out
- Meet UL60950 , EN60950 and IEC60950

Notes:

- ① Absolute maximum rating without damage on the converter, but it isn't recommended;
- ② Efficiency is measured in nominal input voltage and rated output load;
- ③ The capacitive loads of positive and negative outputs are identical.

Design Reference

1. Typical application

All the DC/DC converters of this series are tested according to the recommended circuit (see Fig. 2) before delivery.

If it is required to further reduce input and output ripple, properly increase the input & output of additional capacitors C_{in} and C_{out} or select capacitors of low equivalent impedance provided that the capacitance is no larger than the max. capacitive load of the product.

Notes:

1. The unbalance degree of the recommended dual output module load: ≤ 5%; if the degree exceeds ±5%, then the product performances cannot be guaranteed to comply with all the performance indicators in the manual, and please directly contact our technicians for specific information;
2. The max. capacitive load should be tested within the input voltage range and under full load conditions;
3. Unless otherwise specified, data in this datasheet should be tested under the conditions of Ta=25°C, humidity<75% when inputting nominal voltage and outputting rated load;
4. All index testing methods in this datasheet are based on our Company's corporate standards;
5. The performance indexes of the product models listed in this datasheet are as above, but some indexes of non-standard model products will exceed the above-mentioned requirements, and please directly contact our technicians for specific information;
6. We can provide product customization service;
7. Specifications of this product are subject to changes without prior notice.
